

CASIO VX-4 8K to 32K Internal SRAM upgrade

Images from: <https://icelord.net/wordpress/archives/17133>

Original 8K:

32K upgrade:

After swap: Install batteries, press reset button (through hole) on back, press 'All Reset' (through hole) on keyboard. Type in: SYSTEM* then hit EXE. Run RAM tests 4, 5, 6. If no errors returned your upgrade is OK.
